

Harnessing the Power of the Community-Led Approach: A new methodology for large- scale adoption of improved cookstoves

Emily Hosford
May 2019

Improved cookstoves: Vita's experience

- Vita: 60,000 households reached
- Global target of 100 Million ICS by 2020
- Scale up needed

- Research community-led explored how
mobilise communities to adopt
cookstoves

What is Community-Led Total Sanitation?

**Involves
everyone in the
community**

**Collective
community
decision & action**

**Emergence of
Natural Leaders**

**Prompts
self-realization**

Local innovations

**Not dependent
on external
subsidies or
prescriptions**

CLTS Tools and Techniques

4. Scaling
up

3.
Post-Trigger
ing Follow
Up

2. Triggering

1.
Pre-Triggeri
ng

Triggering: Households using three-stone cookstoves vs. improved cookstoves

Conclusion

1. Ability to scale up is urgently needed
2. Communities can mobilise themselves to move to cleaner cooking after triggering
3. CLT- Stoves ☐ Huge potential to increase uptake of cleaner cookstoves
